Cold Chisel legend to rock up a storm at Beeliar Sun Sets

Back for its second instalment as a part of the 2023-24 Cockburn LIVE event series - Beeliar Sun Sets Success will take place on Saturday 17 February 2024.

Thousands are expected to flock to the local oval, following the success of the first Sun Sets instalment in November 2023 at Nicholson Reserve which brought approximately 4,000 people out for a night under the stars.

Hosted at the Success Regional Sporting Facility, the FREE concert hosted by the City of Cockburn will bring together friends and families for an unforgettable night of live music and family fun; including bouncy castles, giant games and a silent disco.

Headlining Beeliar Sun Sets will be one of Australia's most iconic Rock legends, **Ian Moss**.

Once the biggest band in Australia, and remaining a national favourite over the decades, Cold Chisel propelled Ian Moss into the music industry in 1973, where he has maintained rock star status for the past 50 years.

"Western Australia has always been incredibly supportive of my career and music regardless of whether I play with my band or in solo acoustic mode, so any trip to the beautiful West is always highly anticipated," Moss said.

"And, of course, to headline Beeliar Sun Sets in 2024 with my band and to play alongside other incredible Australian performers - Boox Kid, Katy Steele and Ash Grunwald - is something we are all delighted to be a part of and looking forward to."

Kicking off from 5pm, concertgoers can lay out a picnic rug and have a boogie to a stellar line up including – Australian bluesman **Ash Grunwald**, Perth's very own **Katy Steele** (Little Birdy), and singer-songwriter-producer **Boox Kid**.

City of Cockburn Mayor Logan Howlett said the second instalment of Beeliar Sun Sets for the 2023-2024 Cockburn Live event series was guaranteed to appeal to a diverse range of Australian music fans.

"Cockburn has proudly supported the Australian and Western Australian music scene for many years and this concert in Success is another example of that, and our
