

# WHAT TO DO IF YOU'VE FOUND A BABY BIRD

Is it injured?

Yes

Take it to WA Wildlife Hospital. Still unsure? Call first and they will talk you through whether to bring the bird in.

No

Yes

Carefully place the baby bird back in the nest.

Carefully place the bird in its nest, or another suitable tree/shrub within 20-30m of the location found. Monitor the nest for 3-4 hours and if the parents don't return or the bird is in distress take it to WA Wildlife Hospital.

You can leave it alone, it's a healthy fledgling. It's normal for it to be on the ground while it learns to fly. You may see adult birds nearby, likely its parents protecting and caring for it.

No

Does it have any feathers?

Yes

Is it in danger?

Yes

No

No

Can you see an accessible nest nearby?

Please DO NOT feed baby birds under any circumstances.
